

Why Rent When You Can Own?

- You own your hanger...It does not sit on leased ground.
- No one tells you who to use for annuals or where you have to buy fuel.
- You will be able to wash your plane under the eco-friendly shade hanger.
- No airlines to push you out...this is strictly for GA aircraft.
- It can be a tax write off.
- The value will increase instead of decrease as it would on leased ground as the lease nears its end.
- Hangers will meet current wind loads...no more worries about flying inland to tie your airplane on some other airports ramp.
- Far enough inland that the salt air won't eat your airframe and those coastal T-storms won't keep you grounded.
- 15 minutes from downtown Wilmington on a four lane road. 1.3 miles south of 74/76 on Maco Road (3911 Maco Road for a mapquest address)
- Low tax rates. Currently .61 cents per \$100 for county and town combined (30.5 cents each)
- Local Police protection from the Town of Sandy Creek.
- Added security from the 12 single family homes that will be on site. 4 near the entrance and 8 on the other side of the hangers.
- Don't throw money away on rent when you can own for as little as \$350.00 per month!
- Plenty of parking close to your hanger.
- Low cost fuel on site (as low as possible with the current prices).
- FAA approved.

I'm interested, please add me to your list of prospective buyers.
I would like to be informed as the project progresses.
I would also like to be informed when the hangars and/or lots
become available for occupancy.
